

ALPER KAPUSIZOGLU

Back-End Developer — Building Scalable, High-Performance E-commerce Solutions

Ankara, Turkey | ☎ +90 553 108 20 58 | [in alperkapisizoglu](#) | [g alperkpszoglu](#) | [✉ alperkapisizoglu@gmail.com](#)

PROFESSIONAL SUMMARY

Back-End Developer with 3+ years of experience delivering high-quality features on time without compromising performance or maintainability. Experienced in building and operating large-scale production systems serving tens of thousands of users within distributed, service-oriented architectures. Proven contributor to SaaS and e-commerce platforms, actively involved in customer-facing discussions and technical decision-making, translating business requirements into scalable solutions.

EXPERIENCE

Back-End Developer

09.2023 – Present

Oroox Technology

Liechtenstein

- Developed core features for e-commerce platform serving 100,000+ global users in metal manufacturing industry, digitizing calculation, quotation, and production workflows.
- Built multi-tenant SaaS application with modular service architecture using ASP.NET Core Web API, delivering payment integration, translation services, and dynamic email systems for 50+ business clients.
- Improved API response times by implementing Redis caching and database optimization strategies, handling thousands of daily requests with consistent sub-second response times.
- Migrated millions of order records to Azure Blob Storage with structured folder organization, enabling scalable data access and reducing infrastructure costs.
- Designed and integrated RESTful APIs and webhooks for customer ERP and CRM systems, automating data synchronization workflows.

Full Stack Developer

07.2022 – 06.2023

Dogus Technology

Istanbul, Turkey

- Developed accounting management web application using ASP.NET Core, MSSQL with stored procedures, Entity Framework, Vue.js, and TypeScript, streamlining financial workflows for Dogus Construction.
- Built vehicle expertise services platform with CQRS pattern and modular architecture, implementing responsive frontend with Vue.js and TypeScript.
- Contributed to The CoderVerse Mentor app development and participated in technical YouTube live streams on emerging technologies.
- Delivered technical presentations and joined weekly Azure study sessions as part of DevOps Community initiatives.

SKILLS

Back-End: C#, .NET, ASP.NET Core Web API, Entity Framework, RabbitMQ, RESTful APIs, CQRS

Front-End: JavaScript, TypeScript, Vue 3, HTML, CSS

Databases & Cloud: MSSQL, PostgreSQL, MongoDB, Redis, Azure Blob Storage, Docker

PROJECTS

Tatli Sozluk | *Blazor, RabbitMQ, .NET 6, EF Core*

Personal Project

- Built discussion platform using Blazor with CQRS and Onion Architecture, implementing event-driven communication with RabbitMQ.

Blog App | *ASP.NET Core Web API, Vue.js*

Personal Project

- Developed full-stack blog platform with RESTful API backend and Vue.js frontend, featuring authentication, CRUD operations, and responsive design.

EDUCATION

Bolu Abant İzzet Baysal University

07.2019 – 06.2023

Bachelor of Science in Computer Engineering, GPA: 3.54/4.0
